## Course description

### **CETP Book 1 - Basic Principles and Practices of Propane**

The CETP Basic Principles and Practices of Propane offers an "entry level" course that provides pre-requisite instruction about propane's physical and combustion properties, how propane is produced and transported and will aid in preparing for NPGA's CETP certification.

Basic Principles and Practices of Propane is an essential tool for ensuring employee safety and continuing success.

The topics covered are:

- Introduction to Basic Principles and Practices of Propane
- Propane Customer Applications and Customer Service
- Sources and Physical Properties of Propane
- Odorants and Service Interruptions
- Complete and Incomplete Combustion Characteristics
- Standards, Regulations, and Safety
- Bulk Plants
- DOT Cylinders, Propane Piping, and Residential Systems

**NFPA #58 – 2017 edition is required for this course.**

**Prerequisites:** None
